

Pneumatic linear transport arms BLI100

Features

- Transport and assembly of different parts
- High precision
- Repeatability of sequences
- Numerous application possibilities
- Independently adjustable picking up and setting down positions
- Independently adjustable movement speeds
- Able to handle components in tight working spaces
- Hydraulic shock absorbers at the end of the stroke
- Carbide travel stops

To order these pneumatic linear transport arms

Technical data

Positioning accuracy (mm)	0,01
Transportable mass (kg)	0,5
Horizontal force (N)	110
Vertical force (N)	165
Working pressure (bar)	2-6
Net weight (kg)	3,6-3,8

Options

Positioning slides
Pressure and vacuum units

Dimensions and plan – BLI100
