

Tables with reciprocating movement TPA100

Features

- Rotation on the horizontal plane
- Pneumatically controlled by a rack and pinion mechanism
- Absolute precision
- Incorporated fine pitch stop screws made of hardened steel
- Hydraulic shock absorber at the end of the rotation
- Independently adjustable rotation speeds by flow regulators

To order these rotary tables

Technical data

Maximal angle of rotation (°)	180
Angular accuracy (")	20
Flatness of rotation (mm)	0,01
Load moment of inertia (kg.m ²)	0,08
Torque (N.m)	2 and 4
Static load (N)	400
Working pressure (bar)	3-6
Net weight (kg)	3,3 and 3,4

Dimensions and plan – TPA100
